

NO MORE SHAKE, RATTLE, AND ROLL !! **(in any seismic zone)**

In the past you had only two choices for anchors....

----buy a premium anchor at a premium price, or

----buy a 3rd world import at a slightly lower price.

Now, you have a new option...high quality, high-load

***metric anchors** with a wide selection of sizes and*

designs, and all at a very competitive price.

It's good to have choices.

Visit us on the web at:

AnchorsPlus.Com
